For the six months ended September 30, 2009

1. Nature of Business and Basis of Presentation

Sanatana Diamonds Inc. (“Sanatana” or the “Company”) was incorporated on June 25, 2004 in the Province of British Columbia under the British Columbia Business Corporations Act. The Company is an exploration stage company, and its principal business activity is the acquisition, exploration and development of properties. The Company has mineral property rights in the Northwest Territories which it is exploring and developing in a joint venture with Kennecott Canada Exploration Inc. (“Kennecott”).

The Company is in the process of exploring its mineral property interests and has not yet determined whether its mineral property interests contain mineral reserves that are economically recoverable. The Company’s continuing operations, and the underlying value and recoverability of the amounts shown for mineral properties are entirely dependent upon the existence of economically recoverable mineral reserves, the ability of the Company to obtain the necessary financing to complete the exploration and development of its mineral property interests, and on future profitable production or proceeds from the disposition of the mineral property interests.

The business of exploring for and mining of minerals involves a high degree of risk and there can be no assurance that current exploration programs will result in profitable mining operations. Changes in future conditions could require material write-downs of the carrying values.

Although the Company has taken steps to verify title to the properties in which it is conducting exploration and in which it has an interest, in accordance with industry standards for the current stage of exploration of such properties, these procedures do not guarantee the Company’s title. Property title may be subject to unregistered prior agreements, unregistered claims, and non-compliance with regulatory requirements.

2. Ability to Continue as a Going Concern

The accompanying financial statements have been prepared in accordance with Canadian generally accepted accounting principles (“GAAP”) applicable to a going concern, which assumes that the Company will be able to continue in operation for the foreseeable future and will be able to realize its assets and discharge its liabilities in the normal course of business. Accordingly, these financial statements do not reflect any adjustments to the carrying values of the assets and liabilities, the reported expenses, and the balance sheet classifications used that would be necessary if the going concern assumption were not appropriate. Such adjustments could be material. As at September 30, 2009 the Company has no source of operating cash flow and has an accumulated deficit of \$13,410,707. Operations for the period ended September 30, 2009 have been funded primarily from issuances of capital stock and from contributions received from Kennecott. Should the current weak market for diamond exploration persist, management expects challenges raising further financing.

3. Basis of Presentation and Adoption of Accounting Policies

These unaudited interim consolidated financial statements have been prepared in accordance with Canadian GAAP for the presentation of interim financial information. These financial statements do not include all disclosures required for annual financial statements and therefore should be read in conjunction with the most recent audited annual consolidated financial statements of the Company for the year ended March 31, 2009.

Presentation

Where applicable, comparative figures have been reclassified to conform with presentation used in the current year.

The financial statements follow the same accounting policies and methods of their application as the annual financial statements except as described below.

Effective April 1, 2009, the Company adopted the following accounting pronouncements:

Section 3064, "Goodwill and Intangible Assets". This section replaces Section 3062, "Goodwill and Other Intangible Assets" and Section 3450, "Research and Development Costs". Various changes have been made to other sections of the Canadian Institute of Chartered Accountants ("CICA") Handbook for consistency purposes. Section 3064 establishes standards for the recognition, measurement, presentation and disclosure of goodwill subsequent to its initial recognition and of intangible assets by profit-oriented enterprises. Standards concerning goodwill are unchanged from the standards included in the previous Section 3062. The adoption of this section has had no significant impact on the Company's financial statements

The Company plans to adopt accounting pronouncements as follows:

- a) Section 1582, "Business Combinations". This section establishes the standards for the accounting of business combinations, and states that all assets and liabilities of an acquired business will be recorded at fair value. Obligations for contingent considerations and contingencies will also be recorded at acquisition date fair value. The standard also states that acquisition-related costs will be expensed as incurred and that restructuring charges will be expensed in the periods after the acquisition date. This standard is equivalent to the International Financial Reporting Standards on business combinations. The Company will be required to adopt this standard prospectively for business combinations with acquisition dates on or after April 1, 2011, but may adopt the standard sooner. The Company is currently evaluating the impact of adopting this standard on its financial statements.
- b) On February 13, 2008, the CICA Accounting Standards Board adopted a strategic plan for the direction of accounting standards in Canada. As part of that plan, accounting standards in Canada for public companies will converge with International Financial Reporting Standards ("IFRS") by 2011. The Company's first year end under IFRS will be March 31, 2012. The Company continues to monitor and assess the impact of the convergence of Canadian GAAP and IFRS.

6. Common Shares (continued)

c) Escrowed shares

Pursuant to escrow agreements, 13,803,373 of the Company's common shares were placed in escrow at the time the shares were first listed on the TSX Venture Exchange ("Exchange"). The escrowed shares were subject to a three-year automatic time release escrow, in equal tranches of 15% of each principal's holdings released at six-month intervals, with 10% of each principal's holdings being exempt from escrow effective on the date the Company's shares were first listed on the Exchange.

As at September 30, 2009, no common shares (March 31, 2009 – 2,070,506 common shares) remained in escrow.

7. Share Purchase Warrants

The Company's movement in share purchase warrants is as follows:

	September 30, 2009		March 31, 2009

Balance, end of period	-	-	9,657,769	\$0.65

There are no outstanding warrants at September 30, 2009.

8. Stock Options

In 2005, the Company's shareholders approved a stock option plan (the "2005 Option Plan") which is a "rolling" plan that provides for the issuance to directors, officers, consultants and employees of the Company up to 10% of the common shares of the Company issued and outstanding at the date of the stock option grant. In July 2007, the Company's shareholders approved a stock option plan with similar provisions to the 2005 Option Plan under the rules of the Exchange. The 2007 stock option plan is considered a continuation of the 2005 Option Plan and was most recently confirmed by shareholders in September 2008. The directors may set option terms, but options granted under the plan typically have a life of five years and vest over an 18-month period. Stock option compensation expense is amortized over the vesting period.

13. Financial Risk Management (continued)

The Company manages its credit risk by investing only in obligations of any province of Canada, Canada or their respective agencies; banker's acceptances purchased in the secondary market and having received the highest credit rating from a recognized rating agency in Canada, with a term of less than 180 days; and bank term deposits and bearer deposit notes, with a term of less than 180 days.

The Company's maximum exposure to credit risk at the reporting date is the carrying value of cash and cash equivalents, and amounts receivable.

Liquidity Risk

The Company manages liquidity risk by maintaining adequate cash and cash equivalent balances. If necessary, the Company may raise funds through the issuance of debt, equity or monetization of non-core assets. The Company ensures that there is sufficient capital to meet its obligations by continuously monitoring and reviewing actual and forecasted cash flows, and match the maturity profile of financial assets to development, capital and operating needs.

14. Subsequent event

On October 5, 2009, the Company entered into an option agreement with Marmac Mines Ltd. ("Marmac") to acquire a 50% interest in four mineral concessions located in the Piche Lake area of Alberta. The Company will earn 10% interest in the property by paying to Marmac \$52,500 upon receipt of the TSX Venture Exchange approval (received), drilling a minimum of two test holes on or before April 10, 2010, and incurring a minimum of \$100,000 of exploration expenditures on or before June 30, 2010.

After earning the 10% interest in the property the Company will have the right to earn a further 40% interest by incurring \$1,000,000 in exploration expenditures on or before April 1, 2012.

After earning its 50% interest, the Company will enter into a joint venture agreement with Marmac.
